

CBSE Science Exhibition 2022-23

Dear Management,

Am fortunate to attend the expo as a parent of Allen Joseph, G who has participated in the expo.

As have seen my son doing the project work for couple of months, with lots of expectation have visited the expo. It was a well organised expo with proper arrangements, the expo was organized neatly and orderly. Am honoured to witness the projects of various schools, almost all of them had unique and simple ideas which can make a impact in the society if implemented.

Am proud at the same time happy to see that the project done by Sunshine SSM stood

out in many aspects. It was very well planned and executed by the students of Sunshine SSM under the able guidance of their mentor. The stall has appealing pictures pasted all around the wall, which clearly projected the theme of the project (Home Automation). To back up the theme there was a video presentation which was running in loop explaining the project. It was a pleasant surprise that not only the students explained all the process, they also kept the coding source in case of any parent or judges want to see the backend process of the project. The students also articulated the contents very well to all the visitors which included parents, staff and students.

The credit should go to the

Mentors Mrs. Sujitha Mam and
Mrs. Karitha Mam, without their
encouragement and involvement this
could not have been possible. It's
their improvisation and motivation
which has pushed the students
to achieve this result.

Finally thank the Management,
Principal and staff to encourage
the students.

BEST WISHES!
